

Better hearing means better overall wellness

MAY is Better Hearing & Speech Month

Now is a perfect reminder to take care of your hearing health. A baseline hearing exam is essential in promoting healthy hearing. It can help detect hearing loss early enough for your provider to treat it successfully, preventing or reducing the likelihood of physical, mental and social health complications from affecting your quality of life.

As part of Better Hearing & Speech Month, we're encouraging you to be more aware of your hearing health. Visit us in May and receive a complimentary consultation and live-listening demonstration - **as our gift to you!**

**As we follow strict
Covid safety protocols,
an appointment is required.**

**Experience new Oticon More™
hearing devices risk-free. Test
drive this new technology at
home, work and play!**
